The Editor  
Journal of Open Archaeology Data  
Ubiquity Press

Dear Editor,

I am pleased to submit the manuscript “Mini-NusaRC: A Georeferenced Archaeological Site Database for Island Southeast Asia and Madagascar (1,200–1,600,000 BP)” for consideration as a Data Paper in the *Journal of Open Archaeology Data*.

This paper presents Mini-NusaRC, a georeferenced compilation of 80 dated archaeological sites across eight regions of Island Southeast Asia (Indonesia, Malaysia, Philippines, Timor-Leste) and Madagascar. To my knowledge, no standardized, georeferenced database of dated archaeological sites currently exists for this region — despite its global significance for hominin evolution, modern human dispersal, and Austronesian expansion.

Mini-NusaRC covers five hominin species (*H. sapiens*, *H. erectus*, *H. floresiensis*, *H. luzonensis*, and unidentified tool-makers), seven dating methods, and a temporal span from 1,200 to 1,600,000 BP. The database includes both volcanic regions (Java, Sumatra, Flores, Philippines) and non-volcanic controls (Kalimantan, Madagascar), enabling the first systematic comparison of archaeological site distributions across volcanic and non-volcanic landscapes in Island Southeast Asia.

The dataset is designed as a seed for a comprehensive Nusantara chronometric database and has been deposited on Zenodo [DOI to be inserted after upload] under a CC BY 4.0 license, in CSV format.

**APC waiver request.** I respectfully request a full waiver of the article processing charge. This research was conducted without external funding at Universitas Muhammadiyah Malang, Indonesia, which does not provide APC support for journal publications. The dataset fills a critical infrastructure gap for ISEA archaeology and is intended for broad community reuse and expansion.

This manuscript has not been submitted elsewhere and is not under consideration at any other journal. The author declares no competing interests.

Sincerely,

Mukhlis Amien
